Not-for-Profit finance solution from m-hance

m-hance NfP 365 Finance

m-hance specialises in providing Microsoft Dynamics software solutions to charities and Not-for-Profit organisations. We have collaborated with many organisations in this sector over the past few years; working with them in partnership to understand their unique needs and helping them to manage their supporter relationships and finance requirements separately.

By utilising Microsoft's new cloud technology, we have created a comprehensive end to end solution, which enables charities to manage all of their marketing and fundraising activity, volunteers, financials, reporting and more, together in one seamless solution.

Understanding your financial requirements

Categorise financial transactions

The ability to connect transactions to each relevant activity helps charities to understand where and how money is being spent. With our NfP 365 Finance solution, all transactions can be tagged with various reporting categories dependent on your charity's specific requirements. This ensures that your data can be drilled into easily.

Unify with your existing products

We are finance people too and understand the preference of working in Microsoft Excel, part of the Microsoft Office (O365) suite. Our solution works in unison with O365 by providing functionality to easily export data into Excel, amend and publish back into NfP 365 Finance.

Keep track of costs

Budgeting is key for any type of organisation to manage their costs. NfP 365 Finance can have multiple budgets for your reporting categories. Budgets can be exported to Excel, sent out to budget holders and easily imported back ready for reporting.

Accurate reporting in real-time

Accurate and transparent reporting for NfP's is key. Via the creation of high quality management reports, including full SORP reporting compliance, NfP 365 Finance gives you all the information you need instantly for decision-making, whether this be on a laptop, tablet or mobile device.

Control your purchases

Purchase control is important for any organisation, but for charities it is vital to make sure spending doesn't get out of hand. Our solution can create workflows that provide multiple steps of approval as required. The approvers don't even need access to the finance system, just an email to approve and move on to the next step of the process.

Automate Partial VAT recovery

Ensure your VAT is correctly accounted for through our Partial VAT module. Utilise the functionality within NfP 365 Finance, along with our expertise in assisting charities with complex Partial VAT rules. Save time and avoid operational delays with our effective solution to reclaim VAT correctly, without the need for any 3rd party software.

Why use a cloud-based financial solution?

- **Value for money** - the software is supported and hosted by Microsoft. They have their best people looking after the systems, backups and disaster recovery.

- **Up to date** - you'll always be on the most recent version to keep you compliant and current. NfP 365 Finance has two major updates per year, meaning you'll always have the latest capabilities when you need them.

- **Modern intuitive solution** - users can pick the system up fast. It's designed to be easy to use and learn.

Why m-hance?

We are a leading Microsoft Dynamics Gold Partner and a respected provider in the Not-for-Profit sector. We have successfully delivered over 100 Microsoft Dynamics software implementations, and today we support more than 80 Not-for-Profit customers with Microsoft Dynamics solutions that include leading charities such as Oxfam Ireland, Amnesty International and Solent Mind.

"With you all the way", our preferred approach is to work in collaboration with our customers. We do this by taking the time to understand organisational goals and our role in supporting these, and then working alongside you 'end to end' to achieve this, from an initial discovery meeting right through to project planning, implementation and ongoing support.

Through this unique approach, combined with leading Microsoft Dynamics solutions and Microsoft's commitment to the Not-for-Profit sector, we provide a future-proof, scalable solution that works harmoniously alongside your existing Microsoft environment.
