

Fabric in 30

Turn disconnected data
into confident decision-
making

Build a trusted data
foundation for reporting,
Copilot and AI in just 30
days

The Challenge

Most nonprofits already have the data they need, but it often sits across disconnected systems.

Teams rely on spreadsheets and manual reporting to bring data together, limiting visibility, slowing decisions and making it harder to link supporter activity with outcomes.

How mhance delivers

Fabric in 30 helps you unify your data into one trusted analytics environment.

We connect key systems, reduce manual reporting, improve governance and deliver practical insight with a scalable foundation for Copilot and AI.

Whats Included

Discovery & Data review

Understand your fundraising, finance and service data priorities

Data connection & Setup

Connect supporter CRM, finance systems and operational spreadsheets

Dashboards & Reporting

Create clear insights on income, impact and organisational performance

Delivered in 30 days
